Preventing Famine in a Changing World

**Fri, Apr 10
11:00 am**

Sabatini Multicultural
Resource Center
1299 Oread Ave
**In-person
& Online**

In a time of increasing famine risk globally, this talk explores a new approach to understanding and potentially preventing these extreme crises. It describes three enduring paradoxes that complicate the world's famine prevention efforts and draws on examples from contemporary and historical crises to illustrate how recent developments in famine studies may point to possible resolutions. It concludes by presenting an emerging framework for preventing famine in a complex and rapidly changing world.
